Dave Bockman, MAFCA Technical Director, 2016, answers a question from an Australian Model A club member-

**Re: Top Bows**

Your question: **My main problem is the roof getting it right with height of hood bows**

**Answer:** I just got a call from "Wood for Fords / Fordwood". Anna and Henry Cubels own and manage the company and were very helpful to provide me with some information that may help you with your question. They said that all the top bows for your 1928 Tudor should have an arc of 7/8 inch. All the top bows have the same arc. With the bow sitting on a flat surface and the ends resting on the flat surface, the center of the bow will be 7/8" from the flat surface to the bottom of the bow.

The best place I have found for instructions and pictures on how to install the top material on a 1928 Tudor is on the website provided by Marco Tahtaras.

## Mystery Local Tour Saturday August 20<sup>th</sup>

**Thank you** to Alan & Rene' for all the work that went in to this fun tour! We had a great turnout & a lovely day ending with lunch at Franceschi park with a view to the whole city! Those who came in their A's were Bob & Annette, Fred, Ed & Linda, John G., Lorne & Christine, Aaron & Robin, Ralph M., Ron & Elaine, Eric & Margaret, Alan & Rene', John & Mary, Bill & Leslee and Truett & Jill. Jay & Jaime came in their '41 Lincoln Continental and Bob & Susan came in their modern. The tour took us through Hope Ranch to see many different interesting houses owned or previously owned by well known people or companies, interesting gates, the frog shrine on the Riviera & even one member's childhood home that was later bought by a former member of this club.

Best paint job ever!
